### 1. Product Overview

ROOTYM supplies fresh N-53 Nashik red onions sourced from Nashik, Maharashtra, India for international B2B buyers. The product is positioned for wholesale distribution, foodservice, retail supply and commercial food applications. Supply is planned according to buyer quantity, packaging, quality and shipment requirements.

### 2. Physical & Commercial Specifications

| Parameter      | Commercial Specification                                                                            |
|----------------|-----------------------------------------------------------------------------------------------------|
| Variety / Type | N-53 red onion                                                                                      |
| Origin         | Nashik, Maharashtra, India                                                                          |
| Product Form   | Fresh whole onions                                                                                  |
| Colour         | Red / red-skinned onion; final commercial acceptance as per agreed buyer specification              |
| Size / Grade   | To be confirmed as per buyer requirement and agreed grade                                           |
| Appearance     | Sound, clean and commercially acceptable fresh onions; final acceptance as per agreed specification |
| Foreign Matter | Not intentionally present; tolerance / acceptance criteria to be agreed with buyer                  |
| Packaging      | 10 kg, 20 kg or 25 kg export-grade mesh bags, or buyer-specific packaging                           |
| MOQ            | 24 MT or as per buyer requirement                                                                   |

Note: This document presents commercial product information. Parameters requiring a specific numeric tolerance, grade, size distribution or laboratory result should be finalized against the buyer's purchase specification and shipment inspection.

### 3. Quality & Inspection Parameters

The following parameters may be used for buyer approval and pre-shipment inspection. Specific numeric limits should be agreed in the purchase order or buyer specification rather than assumed.

| Parameter                  | Specification / Status                                                        |
|----------------------------|-------------------------------------------------------------------------------|
| Variety                    | N-53 red onion                                                                |
| Freshness                  | Fresh commercial produce; acceptance based on agreed buyer specification      |
| Size / Count               | As per buyer requirement                                                      |
| Skin / External Appearance | As per agreed commercial grade                                                |
| Damaged / Rotten Bulbs     | Tolerance to be agreed with buyer                                             |
| Sprouted Bulbs             | Tolerance to be agreed with buyer                                             |
| Moisture / Dry Matter      | To be confirmed where required by buyer or inspection protocol                |
| Foreign Matter             | Tolerance to be agreed with buyer                                             |
| Pesticide Residues         | Where required, tested against the applicable destination-market requirements |
| Microbiological Parameters | Where applicable to the buyer's specification / intended use                  |

### 4. Packaging & Handling

| Packaging Option                     | Commercial Use                                                           |
|--------------------------------------|--------------------------------------------------------------------------|
| 10 kg export-grade mesh bags         | Suitable where smaller bulk units are required                           |
| 20 kg export-grade mesh bags         | Suitable for regular wholesale / distribution supply                     |
| 25 kg export-grade mesh bags         | Suitable for bulk commercial supply                                      |
| Buyer-specific packaging & labelling | Available subject to order quantity, destination and agreed requirements |

Packaging configuration, palletisation, container loading and labelling should be finalized against the buyer's destination and shipment requirements.

### 5. Storage & Shelf-Life Guidance

| Item         | Guidance                                                                                  |
|--------------|-------------------------------------------------------------------------------------------|
| Storage Area | Clean, dry and well-ventilated area                                                       |
| Protection   | Protect from excessive moisture, direct water contact and conditions that may accelerate  |
| Handling     | Handle carefully to minimize bruising and mechanical damage                               |
| Shelf Life   | To be confirmed according to crop condition, curing, storage conditions and buyer require |

## 6. Export & Commercial Documentation

Documentation is prepared according to the agreed product, shipment, destination and buyer requirements. The following documents may form part of an export shipment where applicable.

| Document                            | Availability / Applicability                              |
|-------------------------------------|-----------------------------------------------------------|
| Commercial Invoice                  | Prepared for the agreed commercial shipment               |
| Packing List                        | Prepared according to actual packing and shipment details |
| Certificate of Origin               | Where required by the buyer / destination                 |
| Phytosanitary Certificate           | Where required for the destination and shipment           |
| Fumigation / Treatment Certificate  | Where applicable to the shipment and packaging            |
| Product Quality / Inspection Report | Where required or agreed with the buyer                   |
| Shipping / Export Documentation     | Prepared according to agreed export terms and shipment    |

## 7. Buyer Order Information

For quotation and supply planning, buyers should provide the following information:

| Requirement       | Information Requested                                  |
|-------------------|--------------------------------------------------------|
| Quantity          | Required quantity in MT                                |
| Destination       | Port / city / country                                  |
| Packaging         | Preferred bag size or buyer-specific format            |
| Quality / Grade   | Required size, grade and acceptance criteria           |
| Shipment Terms    | Preferred Incoterm and shipment mode                   |
| Delivery Timeline | Required dispatch / delivery window                    |
| Documentation     | Any additional destination-specific documents required |

## 8. Commercial Disclaimer

This sheet is intended as a buyer-facing commercial specification document and does not replace a signed purchase order, approved product specification, inspection certificate or destination-country regulatory requirement. Final product grade, tolerances, quantity, packaging, documentation and shipment conditions shall be as mutually agreed between ROOTYM and the buyer.
